INTENSIVE RETINOL

Ретинолът е водеща молекула в борбата със стареенето. Стимулирайки клетъчното обновяване, той заглажда текстурата на кожата, намалява бръчките и избистря неравномерния тен.

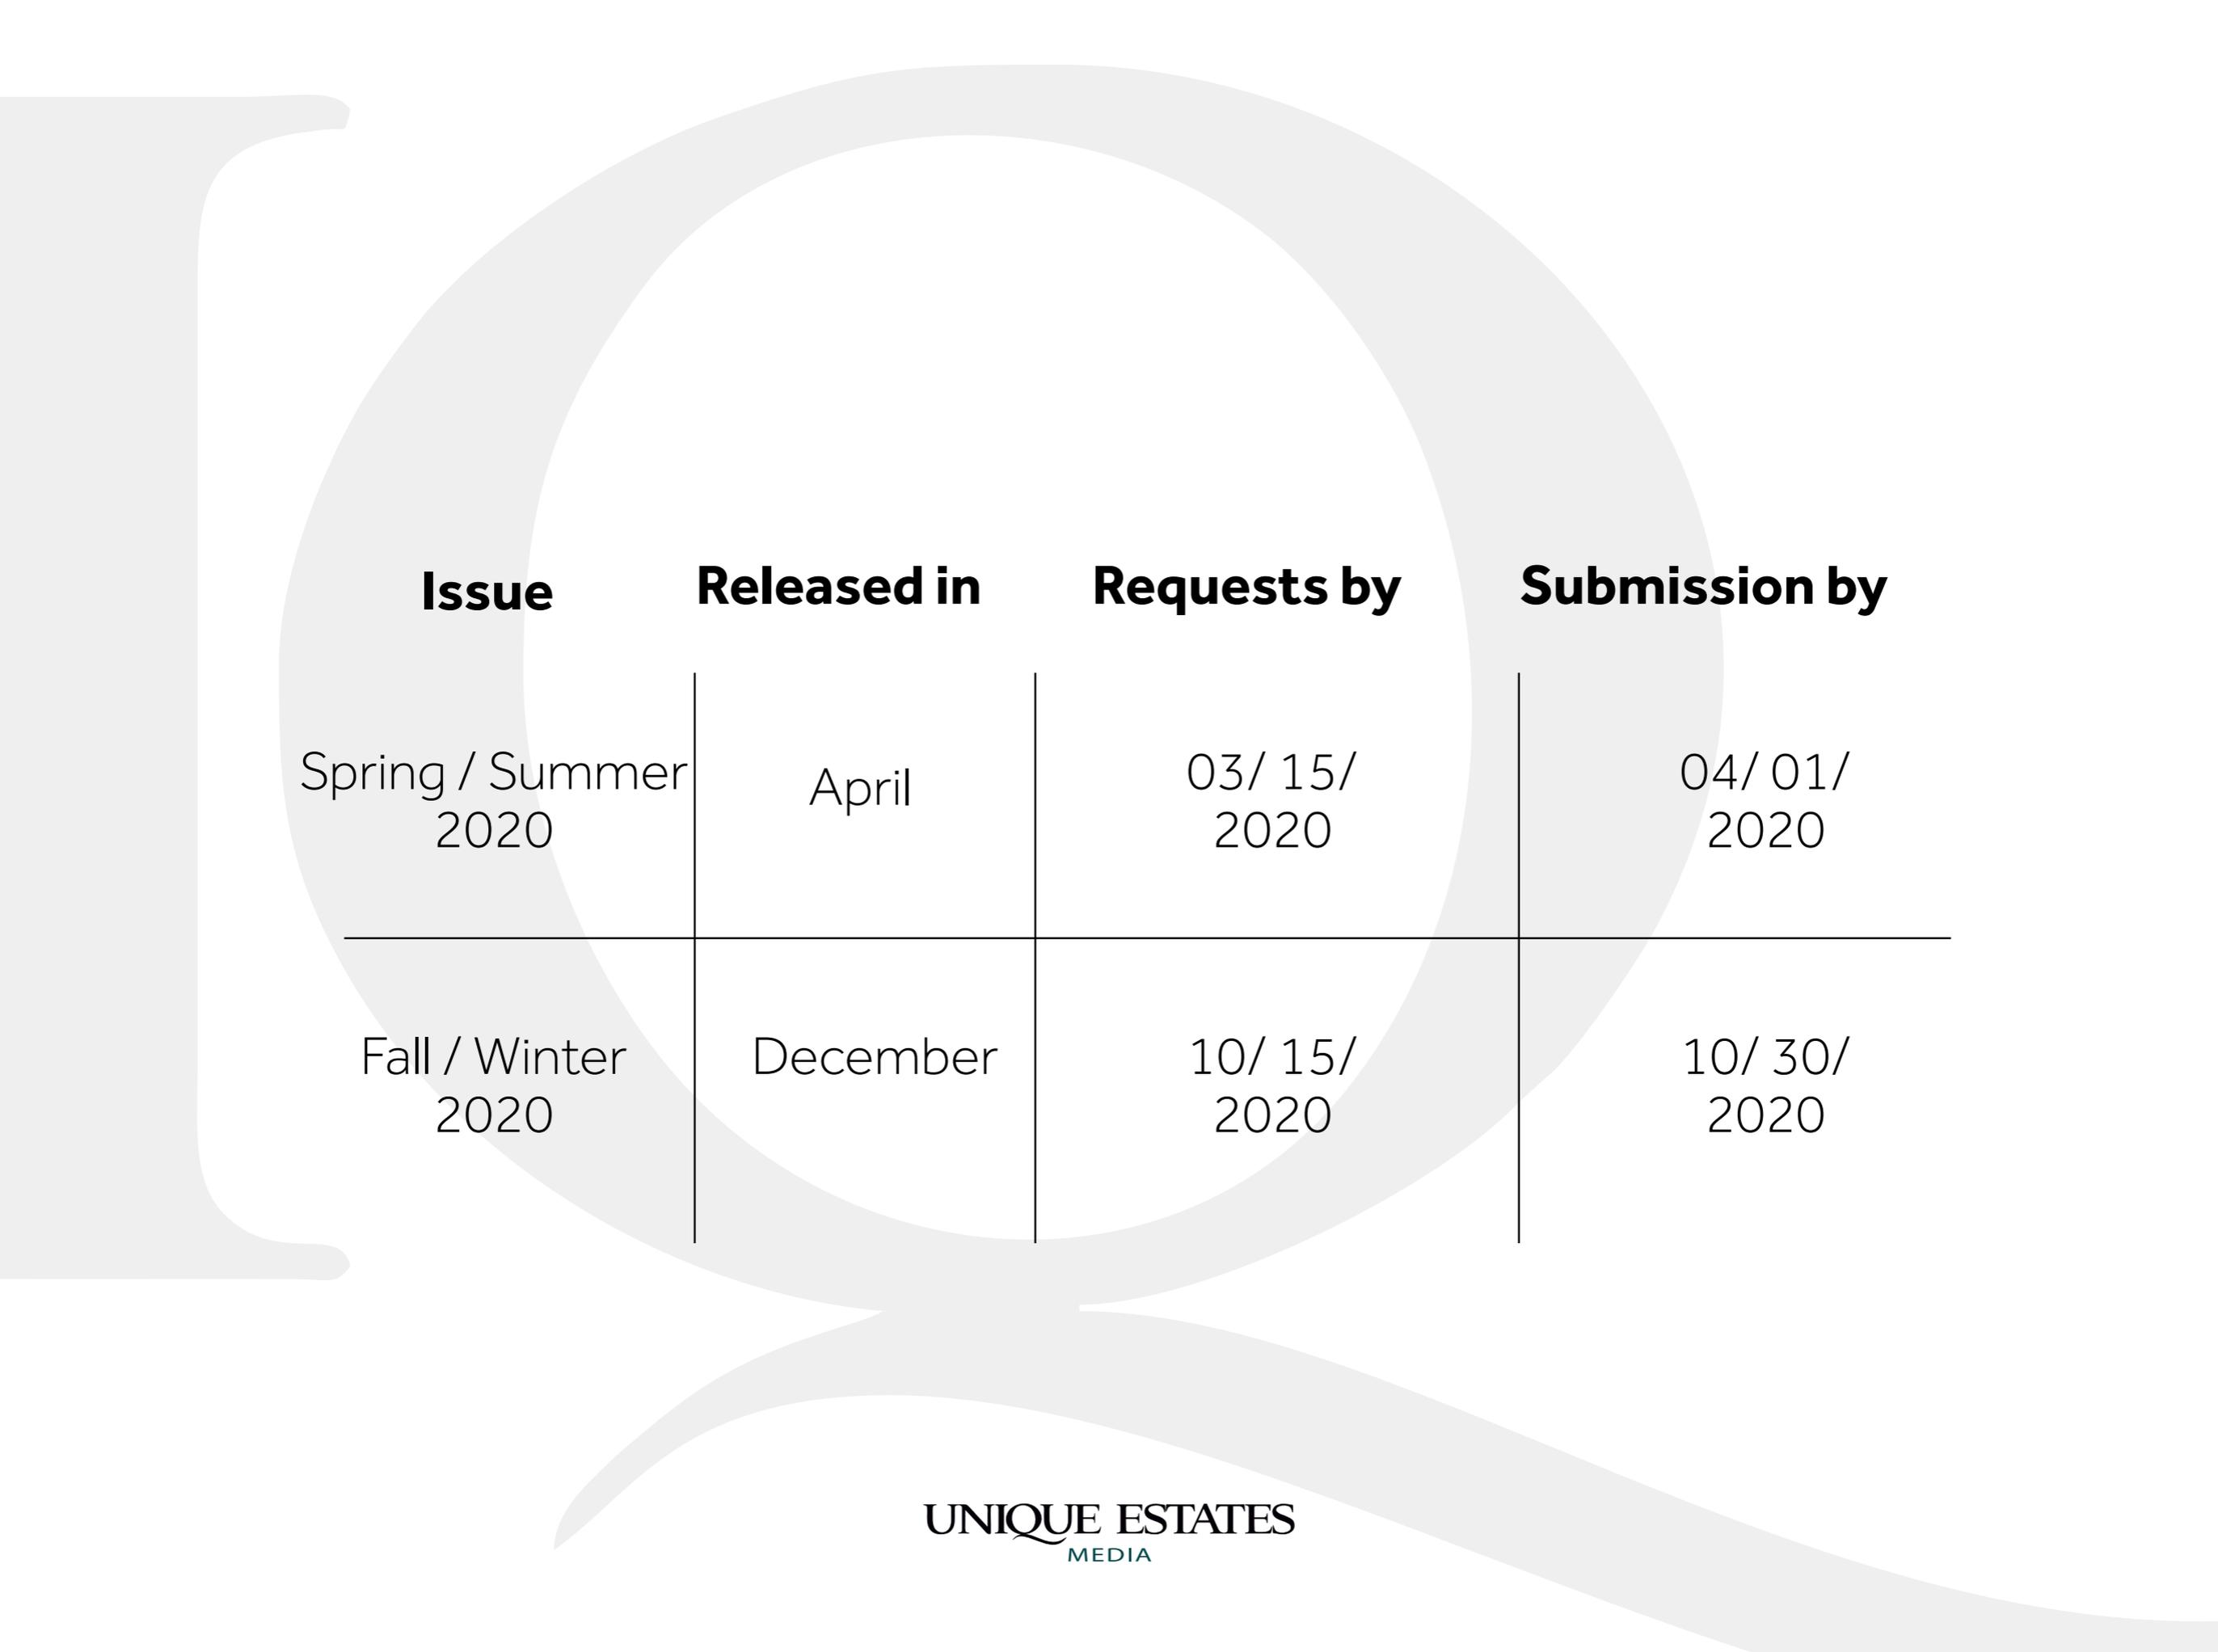

Гамата INTENSIVE RETINOL дължи своята ефикасност на две изключителни формули - крем и серум-олио. Използвани заедно като интензивна даунесъснем терапия, намаляват дълбочината на бръчките, подсилват структурата на кожата и възстановяват младежкия ѝ блясък.
